<u>Tester name:</u>	**Ewelina Linek**
<u>Test date:</u>	**15.02.2019 – 17.02.2019**
<u>Product name:</u>	**Fonda**
<u>Environment:</u>	**DEV** http://front.dev.ncf-fonda.hetzner.lfac.dk/
<u>Platform:</u>	**Windows 10 64 – bit, Chrome 67.0.3396.87 (64 – bit)**

Defect ID: 08

|	
<u>Title:</u>	There is no alphabetical order in the 'Country' drop down
<u>Priority:</u>	**trivial**
<u>Category</u>:	text
<u>Functionality:</u>	Profile information
<u>Description:</u>	When dropping down the list of countries in the 'Country' input, Denmark is in the first place. Other countries are arranged in alphabetical order
<u>Prerequisites:</u>	Active account in the Fonda app

<u>Step to reproduce:</u>

1. Log in to the http://front.dev.ncf-fonda.hetzner.lfac.dk/

2. Switch web page language to English

3. Go to the 'Profile information' tab

4. Click the 'Country' to see the input content

<u>Result:</u>	The first country in the list of countries is Denmark
<u>Expected result:</u>	List of the countries should be ordered alphabetically

<u>Screen shot:</u>

<u>Remarks:</u>	If the specification does not include the fact that Denmark has to be in the first place, this is obviously a mistake. If, on the other hand, Denmark is determined to be in the first place on the list of countries, we do not take this error into account. Additionally, I would advise to use autocomplete in this case as the list of the countries is long and will be faster for the user to start to put the first letters of the country then select one of the proposals.
